ABOUT ME

I am a software developer with **over four years of experience** in frontend development, specializing in **JavaScript** and **React**. I am passionate about building scalable web applications and continuously improving user experiences. Currently, I am seeking opportunities to contribute to innovative projects in a dynamic tech company.

WORK EXPERIENCE

[Apr 2023 – Sep 2024]

Frontend Developer

Yandex

- Developed and maintained a client-side application for product search, enabling seamless e-commerce functionality directly within the search engine results page (SERP)
- Built modular and accessible UI components tailored for e-commerce scenarios, ensuring consistent behavior and design across the SERP interface
- Integrated a dynamic product card module into the right panel of the SERP, enhancing visibility and user engagement with relevant offers
- Optimized rendering and interaction logic to improve overall performance and responsiveness of search-related components
- Contributed to application accessibility (a11y), improving keyboard navigation, screen reader support, and compliance with internal standards

Tech stack: React · TypeScript · Redux · Node.js · Hermione

[Jul 2022 – Mar 2023]

Frontend Developer

Arbitre.AI

- Developed and maintained modular and responsive UI components for a cloud-based infrastructure management platform using React and TypeScript
- Integrated frontend with RESTful APIs and real-time WebSocket streams to enable live updates of tasks, assets, and user events
- Collaborated with cross-functional teams to implement complex workflows and ensure consistent UX across the application
- Improved code quality and maintainability by contributing to a shared design system and promoting reusable component patterns
- Enhanced performance and reliability of the frontend application, including loading states, error handling, and lazy-loading strategies

Tech stack: React · TypeScript · Node.js · WebSocket · Storybook

[Sep 2020 – Jul 2022]

Junior Frontend Developer

BostonGene

- Developed a client-side application to automate personalized oncology report generation, reducing manual work and improving access to treatment data
- Designed and implemented reusable and scalable UI components for the internal component library, ensuring consistency and faster development cycles across multiple teams
- Actively collaborated with external stakeholders and internal product teams to gather business requirements, translate them into technical tasks, and plan implementation at the architectural level
- Participated in performance optimization, refactoring legacy code, and maintaining a clean and modular codebase that adhered to modern frontend best practices
- Took part in cross-team code reviews and technical discussions to maintain high code quality and encourage knowledge sharing within the frontend chapter

Tech stack: React · Redux · SCSS · TypeScript · Node.js

EDUCATION AND TRAINING

[Sep 2021 – Jun 2024]

Master of Computer Science

Bauman Moscow State Technical University <https://bmstu.ru>

Field(s) of study: Information and Communication Technologies | Level in EQF: EQF level 7

[Sep 2017 – Jun 2021]

Bachelor of Computer Science

Bauman Moscow State Technical University <https://bmstu.ru>

Field(s) of study: Information and Communication Technologies | Level in EQF: EQF level 6

SKILLS

JavaScript | HTML | CSS | React | Redux | Node.js | Git | Webpack

HOBBIES AND INTERESTS

Hobbies

From time to time, I enjoy solving problems on LeetCode and working on pet projects. I aim for clean, readable, and stable code. I also attend major IT conferences such as FrontendConf, High Load++, and Podlodka Crew. In my free time, I like to stay active. In the summer, I enjoy windsurfing and in the winter, skiing in the mountains.
